There is a church going sentiment sweeping the country; people are being urged as never before to attend divine worship; newspapers are taking up the cry and assisting in the good cause, as papers are devoting columns each week to having the people tell "why they go to church". This wave has not as yet whom she feels justly proud. Samuel struck Lancaster, or if it has, we have Lee Herron, son of Chief of Police and sed the critical stage of his disease, failed to ubserve it, leastwise, we have Mrs. Luther E. The evil insensity of envy and hate. His Congressman Stanley spoke in the sacred and sainted dead were dragged from the tomb and held up to contum and contempt by servile hirelings and sal unveiling of the Goebel monument that aried slanderers. And when his malignant stands at the foot of the stone steps foes and their accursed gold had failed to debauch the electorate or defeat the fixed leading to the capitol entrance. In an eloquent tribute to the memory of the man whose life was snuffed out by an armed the assassin for the dastardly deed assassin's bullet, delivered in dramatic that closed in darkness his great career and covered the commonwealth with a pull of horror and of shame.

What were the crimes for which Wil-He protected the railroad commission of Kentucky from the miners and suppers who sought to destroy it and with a lash of pitiless scorn drove from the corridors of the capitol a nest of lobbyists who had it the hours of labor for an army of men engaged in the most perilous enterprise known to peace or war that the toller might commune with the family he sustained and that hundreds of men might not be dashed to death because some

weary wretch, driven without rest or repose through the long hours of the day and the night, fell asleep at the key or the switch. He proposed to confer upon the engi-neer at the throttle the same measure of protection which for years the law had secured to the tramp upon the highway. He proposed to extend and enlarge the

meager and ineffectual powers of the Kentucky railroad commission that it might become an actual shield to the shipper from extortion and to the state from fraud and chicane.

Let impartial history, looking back over twenty years of federal legislation, say whether William Goebel was an incen-diary or a seer. The reforms he proposed

for a state became the goal and the mod-els for the lawmakers of a nation. This immortal pathilnder was more than a constructive statesman. He possessed rare and radiant gifts of invention and of prophecy. He not only construct-ed; he created. He was in his day the

unfathomed sea. Esch and Townsend, Hepburn and Dolliver, Adamson, Clark and Wilson, all at last are treading the way biazed a generation ago by the dead William Goebel, who found in his own day no fellow in

the wilderness. For years the progressives in both parties have pointed to the efficient regula-tion and control of railways as their most substantial achievement, and at this hour ing the liberation of the government and the business of the country from cor-porate control by enlarging the powers of a commission authorized to regulate the rates, supervise the capitalization, to de-termine the value and direct the operation of all carriers engaged in interstate

When "all that honor, all that wealth ere gave" were as ashes in his cold hands, in the midst of the agonies of eternal dissolution, his great mission is still before him, and, unmindful of blighted hopes and racking pain, of the gathering shadows and the chilling gloom, his great love con-quers death and rises like a transfigurarepresentative of a great railroad system.
